

Aluminium Powder Als10mg 26 10 2016 Renishaw

Aluminium Powder Alsi10mg 26 10

Material data sheet EOS GmbH - Electro Optical Systems EOS Aluminium AlSi10Mg Robert-Stirling-Ring 1 AD, WEIL / 05.2014 2 / 5 D-82152 Krailling / München

EOS Aluminium AlSi10Mg - GPI Prototype and Manufacturing

At present, aluminum alloy structural parts are mainly manufactured by traditional methods such as casting, forging, extrusion and powder metallurgy []. Although aluminum alloy products made by the above traditional processes have been extensively used, there are still many problems in the process of production and their applications.

A review of selective laser melting of aluminum alloys ...

Powder bed fusion uses an IR laser (typically a 10 μm CO₂ laser) or an IR or UV heat source (lamps) for melting and fusion of mostly semicrystalline powder feedstock. The thermal behavior of the most popular semicrystalline material for powder bed fusion, polyamide 12 (nylon), is depicted in Fig. 1. The melting point is about 35 °C higher than the crystallization temperature.

Materials for additive manufacturing - ScienceDirect

Selective laser melting (SLM), also known as direct metal laser sintering (DMLS) or laser powder bed fusion (LPBF), is a rapid prototyping, 3D printing, or additive manufacturing technique designed to use a high power-density laser to melt and fuse metallic powders together. In many SLM is considered to be a subcategory of selective laser sintering ().

Selective laser melting - Wikipedia

At our die casting manufacturing facilities. We can manufacture die casting parts weighing between 5 grams to 12 kilograms. In order to produce zinc alloy parts, we use hot chamber die casting machines. They are necessary because the melting temperature of zinc-based alloys reaches 900°C.
