Capital And The Common Good

A capital good (also called complex products and systems or (CoPS)) is a durable good that is used in the production of goods or services. Capital goods are one of the three types of producer goods, the other two being land and labour. The three are also known collectively as "primary factors of production" . This classification originated during the classical economics period and has remained ...

In our discussion of APV and the example above, we contemplated a single round of financing that took place in multiple stages (i.e. an initial investment by the VC in Year 0 followed by another investment in Year 1). When a single round is so structured, the VC considers funds committed to all stages fully invested at time $t=0$, and discounts future free cash flows with a hurdle rate that ...
