PREFACE . In developing the policy revisions issued in 1993, the New Jersey Task Force on Police Vehicular Pursuit Policy was mindful of the requirement that such a policy appropriately weigh a police officer's sworn duty to apprehend lawbreakers with the obligation to protect life and the public safety.

Today's internet, accessed by fixed and mobile networks, allows us to transmit files, voice and video across the planet. With the emergence of an ultra-responsive and reliable 'Tactile Internet,' advanced techniques in robotics and artificial intelligence, we predict the emergence of an 'Internet of Skills' which allows the transmission of labor globally.

IEEE-ICASSP-2019

Electroencephalography (EEG) is an electrophysiological monitoring method to record electrical activity of the brain. It is typically noninvasive, with the electrodes placed along the scalp, although invasive electrodes are sometimes used, as in electrocorticography. EEG measures voltage fluctuations resulting from ionic current within the neurons of the brain.

Utilizing all state-of-the-art electronics, the CVD650LCD displays a crisp and vibrant image from up to 5 cameras. Designed and manufactured specifically for heavy duty vehicular applications, our newest display incorporates a high resolution digital LCD panel which triples the pixel count and a LED backlight for greatly improved brightness and a wider viewing angle.

Lidar (/ ' l aɪ d ə: r /, called LIDAR, LiDAR, and LADAR) is a surveying method that measures distance to a target by illuminating the target with pulsed laser light and measuring the reflected pulses with a sensor. Differences in laser return times and wavelengths can then be used to make digital 3-D representations of the target. The name lidar, now used as an acronym of light detection ...
