A spreadsheet is an interactive computer application for organization, analysis and storage of data in tabular form. Spreadsheets developed as computerized analogs of paper accounting worksheets. The program operates on data entered in cells of a table. Each cell may contain either numeric or text data, or the results of formulas that automatically calculate and display a value based on the ...

Spreadsheet - Wikipedia

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.

British anthropologist Mary Douglas (1973) proposed a two-dimensional ordering of ways of looking at the world: 1. 'Group' or inclusion - the claim of groups over members, and 2. 'Grid' or classification - the degree to which interaction is subject to rules. Douglas saw these categories as relating to a wide variety of beliefs and social actions:

Dimensionalizing Cultures: The Hofstede Model in Context

The method of calculating break-even point of a single product company has been discussed in the break-even point analysis article. In this article, I would explain the procedure of calculating break-even point of a multi product company. A multi-product company means a company that sells two or more products. The procedure of computing break-even point [...]
