

Dual Momentum Investing An Innovative Strategy For Higher Returns With Lower Risk

Dual Momentum Investing An Innovative

Momentum investing is a system of buying stocks or other securities that have had high returns over the past three to twelve months, and selling those that have had poor returns over the same period.. While no consensus exists about the validity of this strategy, economists have trouble reconciling this phenomenon, using the efficient-market hypothesis.

Momentum investing - Wikipedia

Since the research of Jegadeesh and Titman in the early 1990's, momentum has been one of the most heavily researched finance topics. Continuing research has firmly established momentum as an anomaly that works well with nearly all markets including equities, stock indices, currencies, commodities, real estate, and bonds.

Marine propulsion is the mechanism or system used to generate thrust to move a ship or boat across water. While paddles and sails are still used on some smaller boats, most modern ships are propelled by mechanical systems consisting of an electric motor or engine turning a propeller, or less frequently, in pump-jets, an impeller. Marine engineering is the discipline concerned with the ...
