Notation and units. As a form of energy, heat has the unit joule (J) in the International System of Units (SI). However, in many applied fields in engineering the British thermal unit (BTU) and the calorie are often used. The standard unit for the rate of heat transferred is the watt (W), defined as one joule per second.. Use of the symbol Q for the total amount of energy transferred as heat ...

**Heat - Wikipedia**

heat (hēt) n. 1. Physics a. A form of energy associated with the kinetic energy of atoms or molecules and capable of being transmitted through solid and fluid media by conduction, through fluid media by convection, and through empty space by radiation. b. The transfer of energy from one body to another as a result of a difference in temperature or a ...

**Heat - definition of heat by The Free Dictionary**

Heat: Heat, energy that is transferred from one body to another as the result of a difference in temperature. If two bodies at different temperatures are brought together, energy is transferred—i.e., heat flows—from the hotter body to the colder. The effect of this transfer of energy usually, but not
