Most of efforts on the research of microplastics have been placed on seawater environment. Less than 4% of microplastics-related studies are reportedly associated with freshwaters (Lambert and Wagner, 2018).The limited information, however, revealed that the abundance of microplastics in freshwaters is comparable to that of marine environment (Peng et al., 2017) and the distribution is highly ...

Resilience research also answers the question I asked myself many times after I grew into

adulthood—a question that every educator has asked at one time or another: Why is one student who's dealing with serious stresses, even trauma, able to overcome these conditions and succeed, while another student cannot?
