Maple Code For Homotopy Analysis

Can someone provide me a simple code to understand Homotopy Analysis Method for solving PDEs. I am a pure mathematician and came to know that Homotopy has found application in solution of PDE. Kindly guide me, as I can understand through a Maple Sheet much easily than a by a book or research paper. Regards

Maple Code For Homotopy Analysis Method

Can some one provide me a simple code for Homotopy Analysis Method in Maple? I have coupled nonlinear PDEs and have calculated the first order answers on paper. I need the mth order answer and I don't know how to write a code in Maple to evaluate it. Kindly guide me, as I can solve my problem. Or could anyone please give me any reference about it?

Evaluating couple PDE with Homotopy Analysis Method

parameters in the problem. A relatively recent method called the Homotopy Analysis Method is useful for developing solutions that are valid even for moderate to large values of parameters. In this paper, we apply the Homotopy Analysis Method to the problem of the axisymmetric flow of a power law fluid past a stretching sheet in order to develop

Homotopy Analysis Method in Nonlinear Differential Equations

The homotopy analysis method (HAM) is a semi-analytical technique to solve nonlinear ordinary/partial differential equations. The homotopy analysis method employs the concept of the homotopy from topology to generate a convergent series solution for nonlinear systems. This is enabled by utilizing a homotopy-Maclaurin series to deal with the nonlinearities in the system.

MAPLE Tutorial 2 (part2) : Homotopy Perturbation Method vs Numerical Method for Nonlinear ODE

A new modification of the Homotopy Analysis Method (HAM) is presented for highly nonlinear ODEs on a semi-infinite domain. The main advantage of the modified HAM is that the number of terms in the series solution can be greatly reduced; meanwhile the accuracy of the solution can be well retained. In this way, much less CPU is needed. Two typical examples are used to illustrate the efficiency ...
