Design Systematic review and meta-analysis. Data sources Major databases from inception to January 2012 without ...

Effects of interventions in pregnancy on maternal weight and obstetric outcomes: meta-analysis of randomised evidence - National Center for Biotechnology Information

The Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN) maintains that the availability of registered nurses (RNs) and other health care professionals who are skilled in fetal heart monitoring (FHM) techniques, including auscultation and electronic fetal monitoring (EFM), is essential to maternal and fetal well-being during antepartum care, labor, and birth.

Fetal Heart Monitoring - Journal of Obstetric, Gynecologic & Neonatal Nursing - jognn.org

The Division of Maternal-Fetal Medicine aims at providing care that is evidence-based. Evidence-based medicine is the concept of treating patients according to the best available evidence. It is unscientific and unethical to practice medicine, teach or conduct research without first knowing all that is already been proven.

MFM Practice Guidelines - jefferson.edu

This is the only center in Arkansas that provides comprehensive, evidence-based, and compassionate high-risk obstetrics, maternal-fetal health, and prenatal diagnosis services in the state. We offer a complete range of services, from genetic counseling to prenatal diagnosis, high-risk pregnancy management, and fetal interventions.
