Myostatin (also known as growth differentiation factor 8, abbreviated GDF-8) is a myokine, a protein produced and released by myocytes that acts on muscle cells' autocrine function to inhibit myogenesis: muscle cell growth and differentiation. In humans it is encoded by the MSTN gene. Myostatin is a secreted growth differentiation factor that is a member of the TGF beta protein family.

x Epidermal cells are positioned on the most out layer of skin and thus have the potential risk of being exposed to environmental factors. The biological effect of ionizing radiation (IR) on the skin tissue is a significant problem for medical applications, such as radiotherapy for cancer treatment.

Results. Non-acylated, Aib2 substituted analogs derived from human GIP sequence showed full in vitro potency at human GIPR and subtly reduced in vitro potency at mouse GIPR without cross-reactivity at GLP-1R. These GIPR agonists lowered acute blood glucose in wild-type and GIP1r-/- mice, and this effect was absent in GIPr-/- mice, which confirmed selectivity towards GIPR.

Optimized GIP analogs promote body weight lowering in mice ...

Clinical—Alimentary Tract Effects of Promotility Agents on Gastric Emptying and Symptoms: A Systematic Review and Meta-analysis. In a meta-analysis of published trials, we found promotility agents to significantly accelerate GE (when optimal test methods were used) and to produce significant improvements in UGI symptoms.

A model organism is a non-human species that is extensively studied to understand particular biological phenomena, with the expectation that discoveries made in the model organism will provide insight into the workings of other organisms. Model organisms are widely used to research human disease when human experimentation would be unfeasible or unethical.

Model organism - Wikipedia

IHC was performed according to the method described earlier [1]. Testis of different age groups of mice (postnatal, weaning, pubertal, reproductively-active and senescence) was paraffin embedded, and 6 µm sections were analyzed by IHC, for adiponectin, AdipoR1, and AdipoR2.

Role of adiponectin as a modulator of testicular function ...

Journal of Vascular Surgery® is dedicated to the science and art of vascular surgery and aims to be the premier international journal of medical, endovascular and surgical care of vascular diseases. Since the first issue was released in 1984, the goal of the journal has been to improve the management of patients with vascular diseases by publishing relevant papers that report important ...
