Meiosis Quizzes, set 1 - sciencemusicvideos

Mitosis is a phase of the cell cycle in which the genetic material from a parent cell is divided equally between two daughter cells. Before a dividing cell enters mitosis it goes through a growth period called interphase. In this phase, the cell duplicates its genetic material and increases its organelles and cytoplasm. Next, the cell enters the mitotic phase.

Mitosis Quiz on Mitotic Cell Division - ThoughtCo

Meiosis is a special type of nuclear division which segregates one copy of each homologous chromosome into each new "gamete". Meiosis, also, reduces the number of sets of chromosomes by half, so that when gametic recombination (fertilization) occurs the ploidy of the parents will be reestablished ...
