Range Of Tenor Voice

Vocal range is the measure of the breadth of pitches that a human voice can phonate. Its most common application is within the context of singing, where it is used as a defining characteristic for classifying singing voices into groups known as voice types. It is also a topic of study within linguistics, phonetics, and speech and language pathology, particularly in relation to the study of ...

Vocal range - Wikipedia

A voice type classifies a singing voice by vocal range, vocal weight, tessitura, vocal timbre, vocal transition points like breaks and lifts, and vocal register. Voice classification was developed for European classical music and seldom applies to other kinds of singing; voice classification is in the opera to pair roles with voices. Several different voice classification systems are available ...

Tenor Voice Type: Tenor, Range: C3 – B4. Tenor is the highest male voice type you will find in a typical choir. Though it is the voice type with the smallest range, it barely covers 2 octaves from C3 to B4, tenors are the most sought after choir singers for two major reasons. The first reason is that there aren't as many men singing in choirs to begin with.
