Unique application and/or location requirements? Application and location requirements must be determined to ensure the COTS equipment is effectively evaluated for use in the military application. The application and/or location of the COTS equipment may not be according to the classifications normally expected by the military standards. An example is stated in MIL-STD-464 which asks:

Enterprise risk management (ERM) has captured the attention of risk management professionals and academics worldwide. Unlike the traditional "silo-based" approach to corporate risk management, ERM enables firms to benefit from an integrated approach to managing risk that shifts the focus of the risk management function from primarily defensive to increasingly offensive and strategic.

Protection orders are widely used legal interventions intended to reduce the risk of future harm by one person considered to be a threat to another. However, there has been controversy about when and whether such orders are useful. This article is a review of empirical studies of outcomes associated with protection orders and factors associated with violations of the orders.
