Salamanders and Newts - Anapsid

Snake Venom and Bites. Throughout the world, it is estimated there are a minimum of 1 to 2 million annual snakebite incidents (this number includes bites by non-venomous species). Of that number, roughly 50,000 to 100,000 bites result in fatalities worldwide.

Snake Venom and Bites | Reptile Gardens

Ok. Death isn't an issue. What about a bite from a venomous snake? Isn't that a risk? Again, according to John, the large majority of those bitten by venomous snakes (5,000-8,000 annually in the US per the CDC) are actually handling or harassing the snake.. The lesson here?

Snakes in Georgia: The good, the bad...and the TRUTH

Copperhead snakes are some of the more commonly seen North American snakes. They're also the most likely to bite, although their venom is relatively mild, and their bites are rarely fatal for humans.

Copperhead Snakes: Facts, Bites & Babies - Live Science

Description: Not Dangerous (Non-poisonous) - This snake does not have venom that is dangerous to most humans.: Size: Adults of the species *Pituophis catenifer* can be 2.5 - 9 feet long (76 - 279 cm). (Stebbins, 2003) Hatchlings are fairly long, generally around 15 inches in length (38 cm). Most adults of this subspecies, *Pituophis catenifer affinis*, are from 5 - 6 ft. long (152 - 183 cm.)

Conservation Status : The following status listings are copied from the April 2018 Special Animals List and the 2017 Endangered and Threatened Animals List, both of which are published by the California Department of Fish and Wildlife.

Rough-skinned Newt - *Taricha granulosa* - California Herps

The topic of what kind of snakes live in Italy came up but not long after I moved to Maremma, as a consequence of our next door neighbour finding one large one curled-up in her post box one day.

Snakes in Italy. Animals in Italy: Serpente in Italia

Puffins are great parents. They usually mate for life and have one baby each summer. Both parents take care of the baby. Puffins dig burrows in soft earth along cliffs or on beaches for their babies. The burrows are about 3 feet long.

Fun Puffins Facts for Kids

Water moccasins thrive in the southeastern parts of the U.S. but often get confused with non-poisonous water snakes. The difference is most notable when comparing the heads of both snakes. As a pit viper, the water moccasin has the distinctive, wide-jawed, wedge-shaped head, and water snakes do not.

How to Identify a Water Moccasin | Sciencing

Guatemala has 30 volcanoes - three of which are still active. Many people live in the mountains, where it is cool and rainy. Others live along the coastline. People in Guatemala grow coffee, bananas and other crops. Most people live in small, isolated villages.

Guatemala Facts for Kids

What do water snails eat? The common water snail is predominately an herbivore. Water snail mainly feed on the algae that will naturally grow on the inside of your fish tank or fish bowl.

What do Snails Eat?

Reptile and Amphibians Activities & Fun Ideas for Kids ...

The word "amphibian" is derived from the Ancient Greek term ἀμφίβιος (amphíbios), which means "both kinds of life", ἀμφί meaning "of both kinds" and βιος meaning "life". The term was initially used as a general adjective for animals that could live on land or in water, including seals and otters. Traditionally, the class Amphibia includes all tetrapod vertebrates that are ...
