**Solution Set Math Example**

Example Question #4 : How To Find A Solution Set. This means that either  $2x - 3 = 0$ , or  $x + 1 = 0$ . So the values of  $x$  that solve the equation are  $3/2$  and  $-1$ . The question asks us for the sum of the solutions, so we must add  $3/2$  and  $-1$ , which would give us  $1/2$ .

Solution Sets for Equations. The set containing all the solutions of an equation is called the solution set for that equation. If an equation has no solutions, we write  $\emptyset$  for the solution set.  $\emptyset$  means the null set (or empty set). Equation. Solution Set.  $3x + 5 = 11$ .  $\{ 2 \}$ .

Solution set. In mathematics, a solution set is the set of values that satisfy a given set of equations or inequalities. For example, for a set of polynomials over a ring, the solution set is the subset of on which the polynomials all vanish (evaluate to 0), formally The feasible region of a constrained optimization problem is...

Section 2-1 : Solutions and Solution Sets. For equations we denote the solution set by enclosing all the solutions in a set of braces,  $\{ \}$   $\{ \}$ . For the two equations we looked at above here are the solution sets.

Any and all value(s) of the variable(s) that satisfies an equation, inequality, system of equations, or system of inequalities. With a system of equations or system of inequalities, the solution set is the set containing value(s) of the variable(s) that satisfy all equations and/or inequalities in the system. See also.

**Mathwords: Solution**

When an equation has two variables, the set of ordered pairs that are the solution to the equation are called the solution set to the equation. In this tutorial, you'll learn the definition of a solution set and see an example.

**What is a "Solution Set" for an Equation (Algebra)**

The solutions of an inequality can be represented on a number line which is shown in the following examples. Example: Represent the solution set of inequality  $x + 4 \leq 8$ , where 'x' is a whole number.

So many of my students are having difficulty with two-digit subtraction. Many don't have a good foundation in number sense or just making sense of math. We took a look at an example and non-example type of comparison to help in our understanding of subtraction with regrouping (or crossing a ten).
