Statistical mechanics is one of the pillars of modern physics. It is necessary for the fundamental study of any physical system that has a large number of degrees of freedom. The approach is based on statistical methods, probability theory and the microscopic physical laws. It can be used to explain the thermodynamic behaviour of large systems. This branch of statistical mechanics, which treats ...

We limit ourselves for the present to conditions of thermal equilibrium, that is, to a subclass of all the phenomena of nature. The laws of mechanics which apply just to thermal equilibrium are called statistical mechanics, and in this section we want to become acquainted with some of the central theorems of this subject.

Gibbs entropy formula. The macroscopic state of a system is characterized by a distribution on the microstates. The entropy of this distribution is given by the Gibbs entropy formula, named after J. Willard Gibbs. For a classical system (i.e., a collection of classical particles) with a discrete set of microstates, if is the energy of microstate  $i$ , and is the probability that it occurs during ...

The Hamiltonian formulation of Up: No Title Previous: The ensemble concept (heuristic . The Lagrangian formulation of classical mechanics. In order to begin to make a connection between the microscopic and macroscopic worlds, we need to better understand the microscopic world and the laws that govern it.

Lectures on theoretical physics from Cambridge University. Quantum Hall Effect. An introduction to the quantum Hall effect. The first half uses only quantum mechanics and is at a level suitable for undergraduates.

This module delves into the concepts of ensembles and the statistical probabilities associated with the occupation of energy levels. The partition function, which is to thermodynamics what the wave function is to quantum mechanics, is introduced and the manner in which the ensemble partition function can be assembled from atomic or molecular partition functions for ideal gases is described.

Thus many quantum-gravity theorists believe there is a deeper level of reality, where space does not exist... These days, many of us working on quantum gravity believe that causality itself is fundamental-- and is thus meaningful even at a level where the notion of space has disappeared.. Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination of the optimal solution.

3. Dimension 1 SCIENTIFIC AND ENGINEERING PRACTICES. From its inception, one of the principal goals of science education has been to cultivate students' scientific habits of mind, develop their capability to engage in scientific inquiry, and teach them how to reason in a scientific context [1, 2]. There has always been a tension, however, between the emphasis that should be placed on ...

Elliptic Festival: Mini Workshop and Lectures. We are excited to have Zhen Huan visiting from Sun Yat-Sen University this month. To celebrate this, we are stepping up our elliptic activities, starting with a Mini-Workshop (Monday afternoon and Tuesday morning this coming week) and followed by a lunch-time lecture series by Zhen Huan, on Wednesdays and Fridays in 213 for the next two weeks.
