

*The Guide To Breast Reconstruction Step By Step From Mastectomy*

### **The Guide To Breast Reconstruction**

Breast reconstruction is the rebuilding of a breast, usually in women. It involves using autologous tissue or prosthetic material to construct a natural-looking breast. Often this includes the reformation of a natural-looking areola and nipple. This procedure involves the use of implants or tissue taken from other parts of the woman's body. Generally, the aesthetic appearance is acceptable to ...

This type of reconstruction shapes the breast with implants and is usually performed in 2 stages: Using a tissue expander in the first stage and then inserting a breast implant under the muscle in the second stage. An innovative advancement allows for placement of a tissue expander or silicone breast implant over the chest muscle (prepectorally).
