3 Communications Process: Encoding and Decoding . In basic terms, humans communicate through a process of encoding and decoding. The encoder is the person who develops and sends the message. As represented in Figure 1.1 below, the encoder must determine how the message will be received by the audience, and make adjustments so the message is received the way they want it to be received.

What is Intrapersonal Communication? There is some debate as to whether intrapersonal communication is truly communication or not because it doesn't exactly fit our traditional definition of communication. To define intrapersonal communication is a bit of a challenge as there is really only one "person" involved, and consequently, labeling the communication process becomes a bit skewed ...
